Airport Authority Board Approves Phase 2 of its QuieterHome® Program

Louisville, KY (January 27, 2010)– The Board of Directors of the Louisville Regional Airport Authority (LRAA) today approved Phase 2 of its QuieterHome® program, making 93 more homeowners near the airport eligible for customized, sound-insulation treatments, which will reduce noise from aircraft in their homes.

“While the highly successful relocation program will remain a priority until its completion, the QuieterHome® program exemplifies the LRAA’s continuing commitment to being a good neighbor,” said Phil Lynch, Chairman of the Airport Authority’s Board of Directors.

An application package will be mailed to eligible homeowners in Phase 2 tomorrow. A map showing the Phase 1 and 2 boundaries may be viewed on the Authority’s Web site at www.flylouisville.com

In November 2008, the LRAA Board of Directors approved Phase 1 of the voluntary QuieterHome® program, making 61 homes just northeast of—and and closest to—the airport eligible for sound-insulation improvements. To date, 59 homeowners have registered for the program.

Phase 1 is divided into three components (A, B and C). Homeowners who have lived in their homes the longest will be the first to have their homes sound insulated. Construction is scheduled to begin by the end of March for the 15 homeowners in Phase 1A; by the end of July for the 24 eligible homeowners in Phase 1B; and in mid-September for the 20 homeowners included in Phase 1C.

The QuieterHome® Project House, located at 3034 Larue Court, is open to the public from 8 a.m. to 5 p.m. Monday through Friday. Residents are encouraged to visit and speak with program experts to see—and hear—how well the sound-insulation improvements work. Homeowners with questions about the program may contact the project manager at (866) 345-4445 (toll-free).
