## **NOTICE**

### **Possible Impact to Aircraft Arrival and Departure Patterns**

A pavement rehabilitation project at Louisville International Airport will begin on Monday, June 4, 2018 and continue through the month. The work focuses on airfield pavement and will temporarily close a portion of Taxiway B. At this time, there are no expected impacts to the normal traffic patterns for arriving and departing aircraft. However, it is possible intermittent interruptions to normal flight paths could occur due to this project. Please keep in mind if any interruptions occur, they are **temporary** and **no permanent changes to the arrival and departure patterns have been made**. Thank you for your patience during the project.

If you have questions or would like additional information regarding the arrival and departure patterns at the Louisville International Airport, please contact the Airport Authority's Noise Officer Bob Slattery at (502) 363-8516 or [Bob.Slattery@FlyLouisville.com](mailto:Bob.Slattery@FlyLouisville.com).
