NOTICE

Temporary Impact to Aircraft Arrival and Departure Patterns

A pavement rehabilitation project is currently underway at the Louisville International Airport with work focused at the north end of the airfield. Because of this project, normal traffic patterns for arriving and departing aircraft may be temporarily interrupted, resulting in intermittent changes to the flight paths of aircraft during the next few weeks. Please keep in mind this is a **temporary** condition and **no permanent changes to the arrival and departure patterns have been made**. Thank you for your patience during this time.

If you have questions or would like additional information regarding the arrival and departure patterns at the Louisville International Airport, please contact the Airport Authority's Noise Officer Bob Slattery at (502) 363-8516 or Bob.Slattery@FlyLouisville.com.
