COMMUNITY NOISE FORUM (CNF)

Monday, May 23, 2022

Members

Brian Sinnwell, LRAA
Mary Rose Evans, LRAA Board
Bob Slattery, LRAA
Greg Petto, FAA

Jeff Kozak, UPS
Nancy Bowman Denton, Southwest
John Sistarenik, ANA
Tom Foote, Airline Affairs

Guests

Rachel Roarx, Metro 21
Cathy Ward, Saint Joseph

Edward Mansfield, Merriweather
Rose Nett, Old Louisville

- I. Call to order:** The meeting was called to order at 6:00 p.m. by John Sistarenik.
- II. Approval of March 28, 2022, Minutes:** The March meeting notes were reviewed with no changes and approved.
- III. Election of Officers:** John Sistarenik and Tom Foote were re-elected as Chair and Vice Chair respectively. John and Tom will serve as Chair and Vice Chair for one year.
- IV. Working Group Report UPS Hangar:** A Working Group was formed at the March CNF meeting to address concerns raised at that meeting regarding the UPS hangar project in the northwest corner of the airport. The Working Group met three times. John read the report from the working group. A copy of the report will be included in the meeting notes for the May CNF meeting. Rachel Roarx wanted to include for the record additional comments from Councilwoman George that information provided to the community should be proactive instead of reactionary. For example, if an aircraft is taxied instead of towed, or the APU is required instead of using ground power. This type of information should be provided to the community on a proactive basis. Tom replied that UPS cannot make a commitment that an aircraft will never have to be taxied. The information was provided to try and convey to the public the amount aircraft activity that would typically take place. Rachel asked if there were any plans to do a follow-up noise study once the hangar was completed and operational. Bob Slattery replied that he was not aware of plans at this time. However, the airport is planning to begin the process of updating the Part 150 program. Tom said that UPS would be happy to do some additional follow-up with Councilwoman George and thought that it would be a good idea if she could tour the current maintenance hangar at some point in order to see firsthand the types operations that occur. Rachel said that they would willing to continue the conversation in order to determine what proactive measures could be taken that are not neighbor burdensome, create goodwill, allow people to be less impacted and have a good neighbor commitment. Tom replied that UPS would

certainly be willing to do some additional follow-up on this topic. Nancy Bowman-Denton asked that she be included in any additional follow-up. She also asked what impact peak holiday season would have on activity at the hangar. Tom replied that the biggest concern during peak is space for parking aircraft. There is a possibility that they would park an airplane at the hangar for the purpose of creating space at World Port and not for the purpose of maintenance. This could increase the number of trips back and forth from World Port to the hangar during the peak season, but it is really a big unknown at this point.

V. Active Noise Cancellation Grant Update: Bob reported that although he cannot say with 100% certainty, it does appear that we will be getting the grant. However, no formal announcement has been made. Once the airport receives final word, we will let everyone know.

VI. Airspace Project Update: Bob reported that the FAA is holding PBN finalization meetings on June 7 and 8. The purpose of the meeting is to finalize the design of the procedures the group has been discussing for the past several years. This should get the FAA to a “pencils down” stage in the designs where they can begin the community outreach and environmental portions of the project. The FAA is currently scheduled to brief the LRAA on the final designs and next steps in late August. Jeff Kozak reported that he will be attending the meetings on June 7th and 8th and that there will be no additional impacts. If anything, the procedures will be reducing noise from arrivals in Louisville. Currently, implementation appears to be summer 2024.

VII. Part 150 NCP:

A. Noise Insulation Program: Residential – This project is to sound insulate residences within the DNL 65 contour according to the 2021 Noise Exposure Map. Construction is complete for the first 3 groups of 107 families. Construction for a 4th group of 20 families is expected to begin in July. A project for an additional 33 families was awarded at the April board meeting. Designs for an additional 30 families are in-work.

B. Contraflow Exceptions: Contraflow for March was 62% for arrivals from the south and 77% for departures to the south. In April arrivals from the south were 64% and departures to the south were 82%. Daily summaries for each month are contained in the handout. For calendar year 2022 arrivals from the south are 68% and departures to the south are 70%. A monthly summary going back 8 years is included in the handout.

VIII. Current Noise Concerns:

- A. Report on Noise Concerns/Complaints:** A total of 20 comments were received in March. In April, 34 comments were received. Comments and locations are contained in the handout.
- B. Runway Utilization:** Runway utilization for March and April are contained in the handout. Daily runway utilization comments from the Air Traffic Control Tower for March and April are also included in the handout. John asked for additional clarification regarding the comment “picture taker” in the tower comments for March. Greg Petto replied that they are mostly single engine, fixed wing aircraft doing aerial photography. The tower does not know who commissions the aircraft or who they are taking the pictures for. The tower does get advanced notice on these types of flights for the most part, but not always.
- C. Construction and Maintenance Activity:** Brian Sinnwell reported that there are several projects ongoing that affect the airfield. They will be doing some work on the east runway for the next couple of months that will result in some weekend closures of the east runway. Later this summer this work will shift over to the west runway. There will also be an extended closure for taxiway “B” later this fall that could extend into next year.

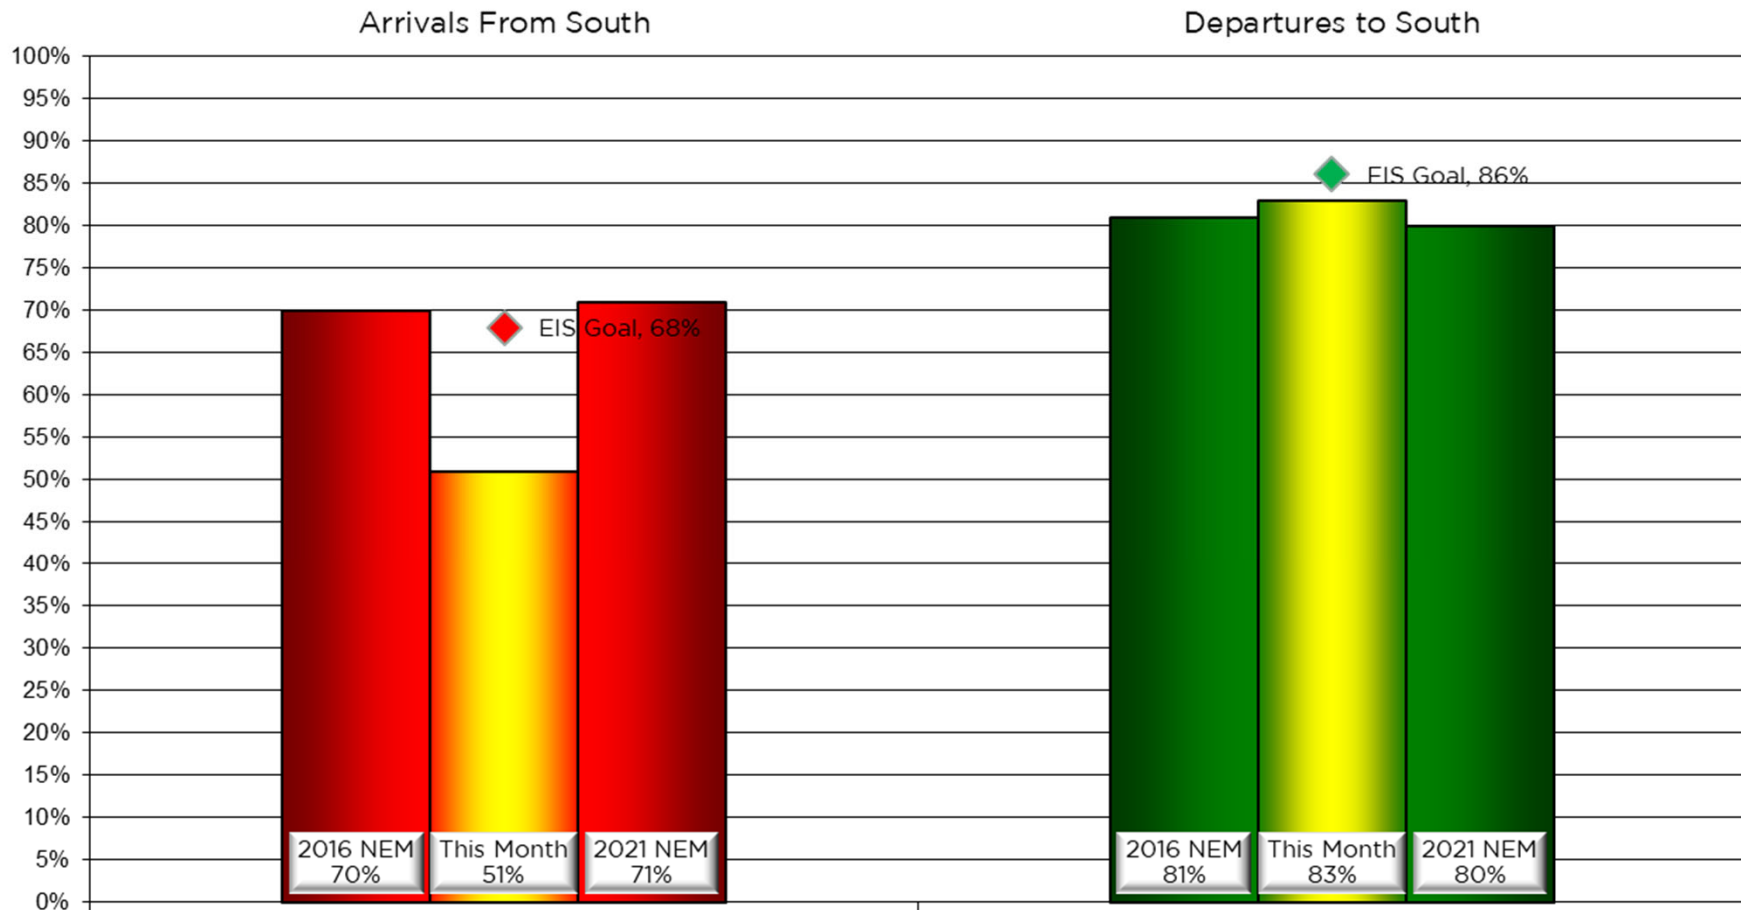

IX. Guest Comments: Edward Mansfield asked if there was an update regarding the tax credit legislation. John responded that unfortunately the measure did not pass. The CNF will continue working to get the measure passed during the next legislative session.

X. Announcements: Mary Rose announced that she will not be taking another term on the Airport Authority Board of Directors. Her current term expires on July 15th and ANA will be nominating John Sistarenik to be her replacement. The nomination from ANA goes to the Governor for approval. Tom Foote thanked Mary Rose for her service on the Board and for being a great steward for the community.

XI. Next Meeting: July 25, 2022

XII. Adjournment: A motion was made to adjourn the meeting at 6:55 p.m.

From what I can tell the wind is 110 degrees at 6 knots. It is just barely going northwest. I am curious if the proper protocol was being followed. I also want to point out that I believe that you are miscalculating some of the data especially compared to how you used to do it. In the data that you have provided the averages of averages and that is not correct.	1

After a relatively quiet Monday. I know you're going to say the weather but every UPS that is over top of my house headed north or northwest. UPS is turning and heading north. Why not just take off north? I know why, U of L on the airport board and gas, and UPS being UPS. Efficiency and gas savings of getting up, out and on heading as fast as possible? as the UPS pilots have told me!	1

Question - what is the minimum number of feet that a plane (such as the aforementioned plane) should be at to safely clear a two story (or one Story). There are also other two-story condos and apartment buildings and trees on the opposite side of Taylorsville Road and Pee Wee Reese Blvd that would be in the flight path. We understand the wind factor has a bearing as well.	1

One of the more overall loud mornings. Seems my complaints may have made it worse because now all are turning the same. My question is why some do not? Bottom line, it's just not right. At this point next level of complaints seems to be our only recourse.	1

It just seems like it is easier to have the planes come over this way.	1
